SPECIFICATIONS

Rated output power: (both channels driven)

200W per channel min, RMS with both channels driven into 8 ohms from 20 Hz to 20 kHz with no more than 0.01% total harmonic distortion (U.S.A.)

200 W + 200 W
(8 ohms, 20 Hz — 20 kHz)
330 W + 330 W (4 ohms, DIN 1 kHz)
450 W + 450 W (at 4 ohms)
620 W + 620 W (at 2 ohms)

Dynamic Power:

Total harmonic distortion:

Less than 0.002% (—3 dB at rated output, 8 ohms)

Intermodulation distortion:

Less than 0.002% (80 Hz/7 kHz: 4/1 at rated output, 8 ohms)

Power band width:

5 Hz — 80 kHz (8 ohms, THD 0.03%)

Frequency response:

- Europe, Australia and U.K. Models.

1 Hz — 300 kHz ± 0 dB (at 1 W) (DIRECT)

1 Hz — 100 kHz ± 0 dB (at 1 W) (NORMAL)

- U.S.A., Canada and Multiple Models.

1 Hz — 300 kHz ± 0 dB (at 1 W)

Input sensitivity:

1V (NORMAL, DIRECT)

Input impedance:

- Europe, Australia and U.K. Models.

25k ohms (NORMAL in / DIRECT in)

- U.S.A., Canada and Multiple Models.

25k ohms (NORMAL in)

47k ohms (DIRECT in)

Output impedance:

0.1 ohm (1 kHz)

S/N ratio:

123 dB (A-weighting)

Output terminals speakers:

- Europe, Australia and U.K. Models.
A or B: 4 — 16 ohms
A + B: 8 — 16 ohms
- U.S.A., Canada and Multiple Models.
A or B: 6 — 16 ohms
A + B: 12 — 16 ohms

General

Self diagnostic function: Display lights

Power supply:

Europe
AC 220 V/50 Hz
U.K. and Australia
AC 240 V/50 Hz
U.S.A. and Canada
AC 120 V/60 Hz
Asia
AC 110/120/220/240 V 50/60 Hz (Multiple)

Power consumption:

7.5A (U.S.A. and Canada)
500 W (IEC)
350 W (Multiple)

Dimensions:

434 mm (17-3/32") W x 187 mm (7-23/64") H x 429 mm (16-7/8") D (Including control knobs and feet)

Weight:

17.5 kg (38 lbs 10 oz)

Design and specifications are subject to change without prior notice.

This Service Manual is prepared based on U.S.A. Black Version.

For United Kingdom model only.

WARNING:

As the colours of the wires in the mains lead of this appliance may not correspond with the coloured markings identifying the terminals in your plug proceed as follows:

The wire which is coloured blue must be connected to the terminal which is marked with the letter N or coloured black.
The wire which is coloured brown must be connected to the terminal which is marked with the letter L or coloured red.

The wire which is coloured BROWN must be connected to the terminal which is marked with the letter L or coloured red.

IMPORTANT

The wires in this mains lead are coloured in accordance with the following code:

Blue: Neutral
Brown: Live

For U.S.A. and Canada models.

CAUTION

TO PREVENT ELECTRIC SHOCK DO NOT USE THIS (POLARIZED) PLUG WITH AN EXTENSION CORD, RECEPTACLE OR OTHER OUTLET UNLESS THE BLADES CAN BE FULLY INSERTED TO PREVENT BLADE EXPOSURE.

• LINE VOLTAGE (Voltage select switch) . . . For Multiple voltage model only.

- * The desired voltage may be set with the VOLTAGE SELECTOR KNOB on the back panel using a screw driver.
- * Do not twist the VOLTAGE SELECTOR KNOB with excessive force. It may be damaged.
- * If the voltage select switch does not turn smoothly, see a qualified serviceman.

NAMES OF PARTS

• FRONT PANEL

Fig. 1

- | | |
|---|---|
| ① POWER (Power Switch) | ⑥ POWER (Power Indicator) |
| ② SPEAKERS-A (Speaker Select Switch-A) | ⑦ "A" (Speaker "A" Indicator) |
| ③ SPEAKERS-B (Speaker Select Switch-B) | ⑧ SPEAKERS (Speaker Function Indicator) |
| ④ SELF-DIAGNOSIS (Self-diagnostic Result Indicator Lamps) | ⑨ "B" (Speaker "B" Indicator) |
| * ⑤ PROTECTOR (Protection Button) | ⑩ INPUT LEVEL (Lch Input Level Control) |
| | ⑪ INPUT LEVEL (Rch Input Level Control) |
- The amplifier incorporates a speaker impedance protection circuit. If this circuit is triggered, it can be released by pressing this button.
 - The speakers-A or speakers-B indicator may flash when using speakers with extremely low impedance ratings. If this happens, adjust the volume level until the indicators stop flashing and to obtain better sound quality.

• BACK PANEL

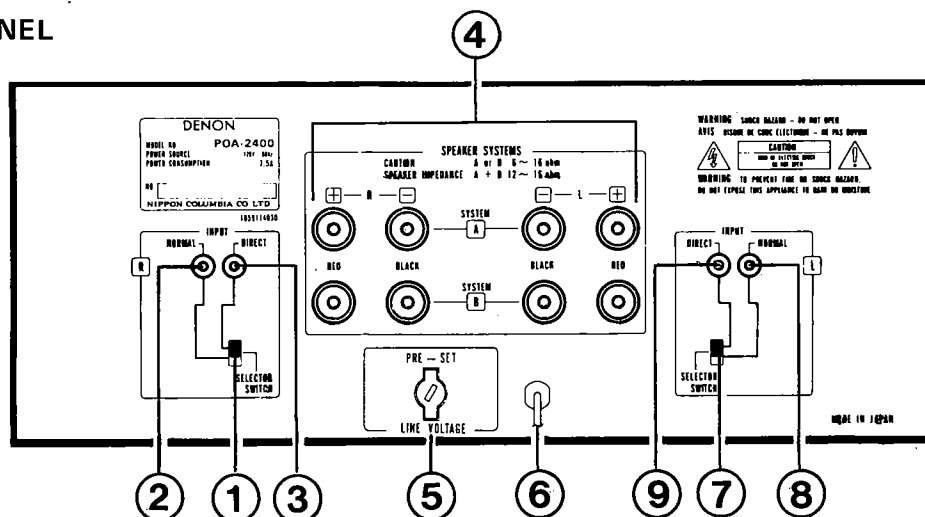

Fig. 2

- | | |
|--|-----------------------------------|
| ① INPUT SELECTOR SW (Rch.) | ⑥ AC CORD (Power Cord) |
| ② NORMAL (Rch. Normal Input Jack) | ⑦ INPUT SELECTOR SW (Lch.) |
| ③ DIRECT (Rch. Direct Input Jack) | ⑧ NORMAL (Lch. Normal Input Jack) |
| ④ SPEAKER SYSTEMS (Speaker Terminals) | ⑨ DIRECT (Lch. Direct Input Jack) |
| ⑤ LINE VOLTAGE (Line Voltage Selector) (Multiple Voltage Model only) | |

CONNECTIONS

• Connection to the speaker system

Connect the speaker system for the left channel (the left side as viewed facing the front) to the L speaker terminal on the back panel, and the speaker system for the right channel into the R terminal. There are two sets of SPEAKERS terminals. If only one speaker system is to be used, connect it to the SYSTEM A terminals.

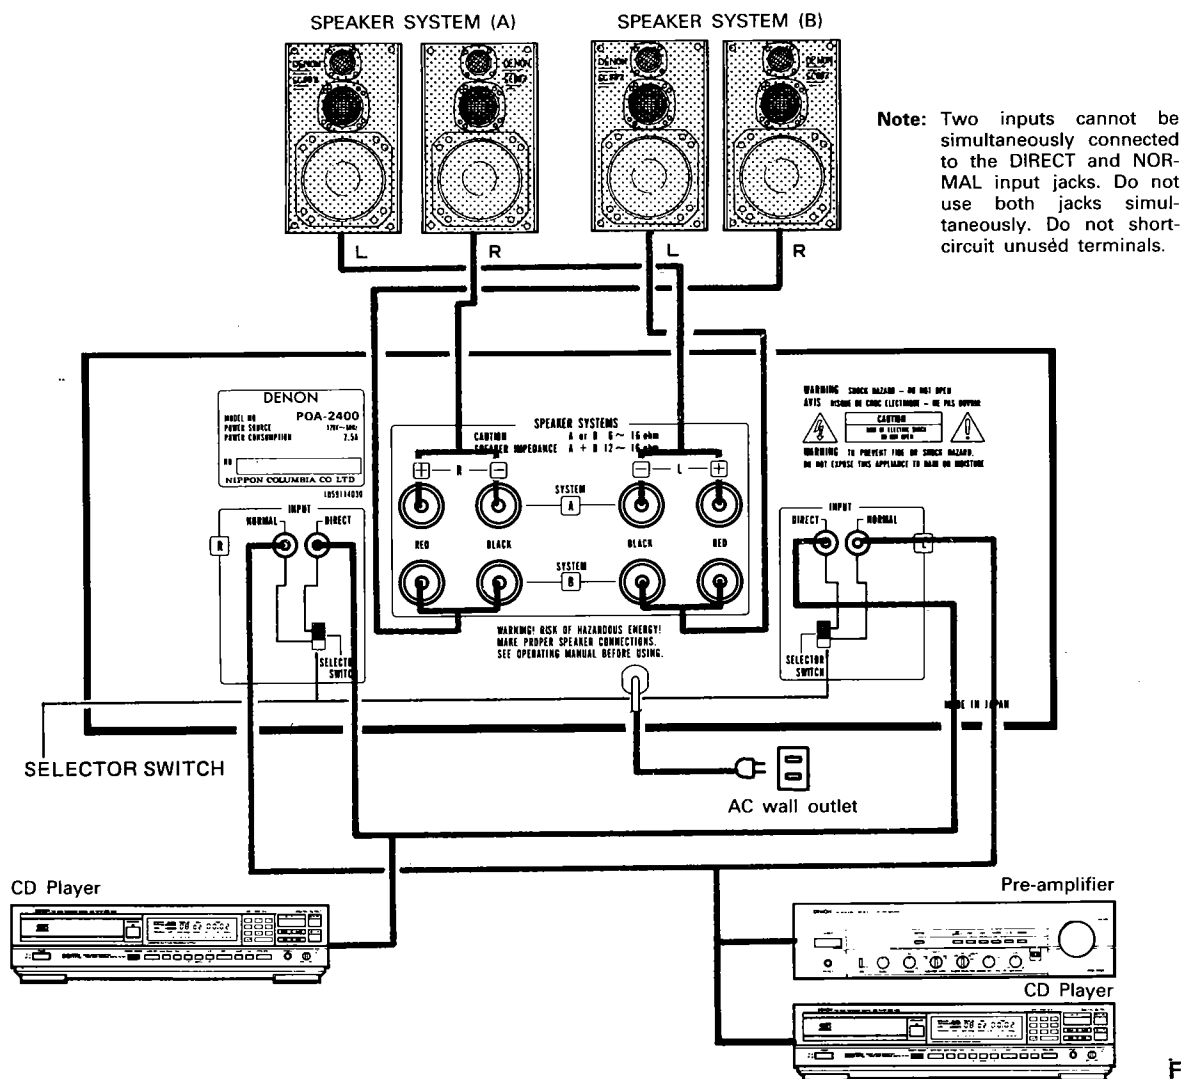

Fig. 3

CONNECTION PRECAUTIONS

- When making connections, make sure that the power is turned OFF.
- Make sure that the L output terminal of the preamplifier (or other audio equipment) is connected to the L input terminal of the POA-2400. Also check that the R output terminal of the preamplifier (or other audio equipment) is connected to the R input terminal of the POA-2400. Connect the cords going to the left speakers to the L terminals of the POA-2400 and the right speaker cords to the R terminals of the POA-2400.
- Make secure connections. If connections are not secure, noise or loss of sound output may occur.
- Do not bundle pin plug cords with the power cords: Please keep pin plug cords away from power supply transformers since hum or noise may occur.

For U.S.A., Canada and Asia model only.

With the DIRECT jacks the input level cannot be adjusted.
Before connecting the DIRECT jacks, either turn the speaker switch off or the power switch off.
Connect a component with an output level control to the DIRECT jacks.

For Europe model only.

Both the DIRECT and NORMAL terminals are feasible to adjust their input levels.
The NORMAL input is provided with a built-in filter to eliminate unwanted high frequency signals.

REMOVAL OF EACH SECTION

1. Top Cover

Remove 8 screws from the both sides, 4 screws from the rear side and detach the Top Cover in the direction arrow shows.

Fig. 4

2. Back Panel

Remove 8 screws from the bottom, 6 screws from the rear side, and take out the Back Panel in the direction arrow shows.

NOTE:

When remove Bottom Cover, do not take out the yellow screws.

Fig. 5

3. Front Panel

Unfasten 4 screws from the bottom, 3 screws from the top, and dismantle the Front Panel.

Caution:

As illustration shows, please put a block underneath the unit and detach the Panel in a straight line to the unit. Never slant the panel nor to detach it with leaned line, this will prevent breaking of the power switch inside.

Fig. 6

METHOD OF ADJUSTMENTS

IDLE CURRENT ADJUSTMENT

• Setup

1. Keep the unit away from direct wind blown by an air-conditioner and an electric fan, and keep the unit under normal conditions. Adjust the range of ambient temperature to 15–30°C.
2. Set the following switches as follows:
 - POWER (Power switch) to off
 - INPUT LEVEL (level control) to 0 (⤵)
 - SPEAKERS (Speaker terminal) to no load (Speakers disconnected)

• Adjustment

1. Connect DC Voltmeter to Test Points (T.P) of KU-9143.
2. Turn Power Switch "ON".
3. Adjust VR501 (L ch) and VR502 (R ch) so that the DC Voltmeter reads 3 ± 0.5 mV.
4. Then after 3 minutes warmup, readjust VR501 and VR502 so that the DC Voltmeter reads 5 ± 1 mV.
5. Connect V.T.V.M. to the Speaker Terminals.
6. Set the Oscillator frequency at 1 kHz, and Output Level at 100 mV, then connect with NORMAL Input Terminal.
7. Adjust the LEVEL Control turning clockwise to obtain the indication of the V.T.V.M. connected to the Speaker Terminal becomes 2 V.
8. Confirm that the DC Voltmeter connected to the T.P. becomes slightly greater value, then adjust the VR503 and VR504 to obtain 50 ± 5 mV on the meter.
9. After 10 minutes, readjust the VR503 and VR504 for 60 ± 5 mV.

Fig. 7

ALIGNMENT POINTS
KU-9143 POWER UNIT (Component Side)

Fig. 8

TROUBLESHOOTING

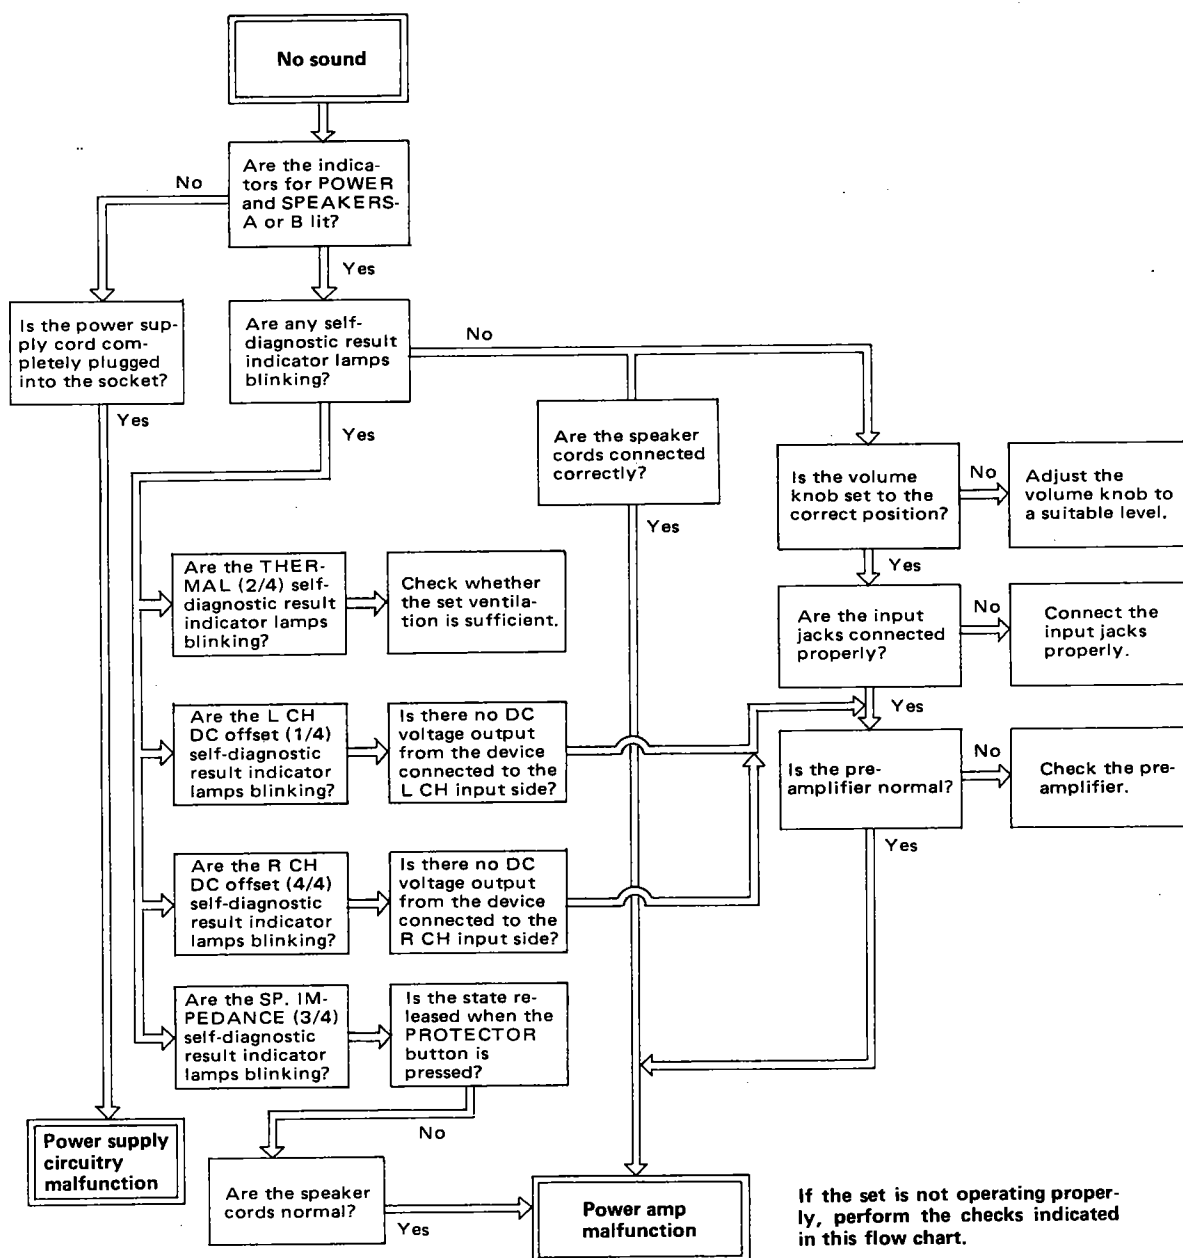

Before troubleshooting, be sure to check whether your audio system is really the source of the problem.

If you think the amplifier is out of order, first check the following one more time:

1. Are all the connections correctly made?
2. Is the set being operated properly in accordance with the Operating Manual?
3. Are the speakers and preamplifier being operated correctly?

If the set does not operate properly, perform the checks indicated in the flow chart below.

If none of the items listed apply to the difficulty, the amplifier is probably out of order. Turn off the power immediately, and contact the outlet where you purchased the amplifier or your nearest DENON dealer.

Note:

1. See addendum list above for the parts with asterisk (*) on the Ref. No. and the other parts not included in the list.
2. * marked not included EXPLODED VIEW OF CHASSIS AND CABINET.
3. This list is prepared based on U.S.A BLACK VERSION.
4. Part indicated with the mark "⊙" are not always in stock and possibly to take a long period of time for supplying, or in some case supplying of part may be refused.

CAUTION

RISK OF ELECTRIC SHOCK
DO NOT OPEN

CAUTION: TO REDUCE THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE COVER (OR BACK). NO USER SERVICEABLE PARTS INSIDE. REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.

The lightning flash with arrowhead symbol within an equilateral triangle is intended to alert the user of the presence of uninsulated "dangerous voltage" within the product's enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

The exclamation point within an equilateral triangle is intended to alert the user of the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.
